ABOUT US

It is a great evolution in ceramic floorings that evoke wood, fusing warmth and naturalness. In this catalogue you will find a wide variety of woods, shades and finishes. The investment in R&D allows us to be the latest not only in the production process, we also have the technology to decorate our pieces providing them with a better finish and a more realistic effect. A careful selection of the most characteristic woods and of greater aesthetic value make our product more differentiating.

We promote our ecological character by obtaining certificates that guarantee our effort. The objective is to preserve the present and the future. Efficient energy management, rational use of water and the minimization of emissions are some of our objectives. For this reason we have recently been granted to our product.

OUR VISION

At here, excellence is not a onetime effort, it's a custom to be followed on regular basis, and so we abide by all the necessary norms and deliver supreme quality resources. We will to continue doing so and attain success by being a market leader. Apart from that, we also desire to be recognized as one of the most fruitful employers for our team, along with being a productive patron for our associates.

A decorative graphic featuring several vertical and horizontal wood planks of different shades (dark brown, medium brown, and light beige). A small potted plant with green, striped leaves sits on one of the planks. The text 'CRAFTED WITH RESPONSIBLY SOURCED MATERIALS' is centered within a dark grey L-shaped frame.
